*Word to the Wise: No single feature will eliminate check fraud completely. However, Positive Pay will eliminate unauthorized checks from clearing your account. Wellspring's PrintBoss software generates the Positive Pay file necessary for the bank

**All Intuit check stock is preprinted with your company name, address, and account and routing numbers. Therefore, unused stock is always a risk liability in case of theft. Blank check stock like all Wellspring Software check stock, comes with no preprinting and thus creates no security liability.
